

NS-SB500 Multi-Purpose Spreader Beam for Forklift & Crane

Forklift Spreader Bar is perfect for safely picking up long products such as plasterboard, roof sheeting, timber, plaster tubing etc.

The NS-SB500 Multi Purpose spreader beam can be used on both a forklift.

If lifting by crane the spreader beam can be centre lifted using the single hook point (see lifting beam load) or end lifted using a 2-leg set of lifting chains (see spreader beam load)

If lifting by forklift the fork pockets allow for fast and safe connection to the fork truck (see forklift attachment load).

The Spreader Beam allows for adjustment of the lifting connection points and has 3 positions available. Closed length 2.4m, intermediate 3.15m and fully extended 3.9m.

A lock mechanism prevents the extendable arms from over extending thus protecting the operator. Supplied with 2 safety swivel hooks.

Finished in long life durable zinc finish to the extension arms with painted safety orange on the body.

Unit weight: 145kg
