

Industrial Forklift Brooms Mega Series

NS-SMB-720 Forklift Broom Mega

When a PRO BROOM is just not tough enough, you can always rely on...

The MEGA SERIES with 11 rows of tough poly bristles in a solid, rolled steel frame.

Sweep or move grain, rubbish, sand, gravel, rocks, glass, plastic, cans, metal swarf, dirt, dust, sawdust, snow and mud, leaf debris and many other materials.

Sweep materials such as plastic shrink wrap and welding wire which cannot be swept with rotary brooms or vacuum sweepers. Pre-sweep larger debris before using your mechanical sweeper. Suitable for applications in every industry including farming, agriculture, grain handling, waste, recycling, concrete, construction, demolition, landscaping, plastics, mining, sandblasting, etc

Economical and practical with a powerful sweeping action at a fraction of the cost of a mechanical sweeper.

Low maintenance: No moving parts to break, repair or wear. Versatile mounting for rapid and simple attachment to your forklift, loader, tractor or telehandler. Sweeps equally well going forward or reverse. Easy, simple cleaning with a hose or high pressure cleaner.

FEATURES & BENEFITS:

Available in either 1800 mm or 2400 mm lengths to get big jobs done fast.

Eleven rows of tough polypropylene bristles.

Solid steel frame, fully powder coated, welded bristle channels.

Proven to cut cleaning time by more than 90%.

Economical, practical and better than manual methods.

A fraction of the cost of ownership and maintenance of a mechanical sweeper.

Will sweep sand, gravel, grain, glass, sawdust, mud, light snow, rubbish, plastic shrinkwrap, wire and standing water.

Sweeps in any direction - forward or reverse.

Brush life estimate well over 800 km's.

Brushes require no maintenance or servicing.

Replacement bristles easy and quick to fit.

Heavy duty for indoor or outdoor use.

Complete with standard forklift mount.
