

## NS-PSTT Scissor Electric Lift Table

The Scissor Electric Lift Table is manufactured for the lifting and tilting of pallets, crates and bins in areas such as production facilities etc removing the OH&S issue of repetitive bending over and lifting with a bent back. As the unit raises, the table top gradually tilts to a maximum angle of 45 degrees, and a maximum lift height of 1620mm. With a capacity of 800kg, the unit can be easily moved around the work area by way of a push handle.

The NS-PSTT is equipped with safety features including "Safety Lowering Valve" over-ride in case of emergency, "Isolation Switch" for operation lockout. Unit is fitted with inbuilt battery charger, simply plugged in to a 240volt outlet for recharging.

### FEATURES:
