

NS 50 Wheelie Binlifter

- Safe lifting capacity of 50kg
- Lifts 80L, 120L, 140L and 240L bins without adjustment
- Simple crank handle operation
- Australian Made and Australian designed

NS 50 wheelie bin lifter is a manual crank handle operated unit that lifts and tips wheelie bins into skip and industrial type bins. It is the ideal unit for intermittent emptying of bins, eliminating the need for manual handling and the risk of personal injury associated with heavy and awkward lifting.

Designed to lift up to 50kg (wheelie bin and contents) at a time, the NS 50 is perfect for schools, offices, factories and local councils that dispose of lighter waste and are required to empty the wheelie bin once or twice a day.

The NS 50 wheelie bin lifter simply raises and tips the bin by manually rotating the crank handle protecting the user from potentially costly back injuries, strains and sprains.

The NS 50 wheelie binlifter is designed and manufactured in Australia using the highest quality components.

It measures 1200mm long x 790mm wide x 1995mm high ensure easy storage and the quality Fallshaw castors provide effortless manoeuvrability and stability while bins are being emptied.

The bin lifter frame has a powder coated finish for weather resistance and all working parts are guarded to prevent access and potential harm.

Operating instructions and warnings are clearly marked on each unit to assist with your OH&S obligations
