

## NS-CR6500 6.5 Tonne Forklift Container Ramp

The 6.5 tonne container ramp design is primarily used for bridging a forklift from standard ground level into a standard shipping container. This is our best selling container ramp and has folding design to save space when not in use. The self-leveling lip allows for full loading capacity even when on slightly uneven ground.

- Fitted with safety chains to loop through the shipping container corner castings to secure the container ramp to the container
- Built to exceed Australian Standards
- 12 Month Warranty
- Container ramp comes with compliance plate with SWL and serial number for Workcover compliance
- Enamel painted finish in Orange color
- Built in pockets for forklift to pickup and locate the container ramp easily
- Hand grips on both side of container ramp to unfold it after fitting to container

Also for sale are our budget model 7 tonne ramp, heavy duty 8 tonne and 10 tonne forklift container ramp for heavy duty use.

Also known as forklift ramp or forklift loading ramp.
